

Geofoam No. 5008

Subject: Chemical Exposure

Date: February 2011 (Revised January 2019)

PowerFoam R-Control Geofoam is used in a wide variety of applications. There may be instances in applications where the PowerFoam R-Control Geofoam is subjected to chemical exposure. This can be by either direct exposure to the chemicals or to their chemical vapors. Exposure to chemicals most commonly occurs during the installation process or as the result of a contaminated site conditions after the PowerFoam R-Control Geofoam is in place.

The attached table provides general guidance for the resistance of PowerFoam R-Control Geofoam to a number of chemicals. The table is intended to provide a preliminary guide, but does not guarantee long term performance of PowerFoam R-Control Geofoam when in contact with the listed or any other chemicals.

It is recommended that laboratory tests modeled to represent chemical exposure in end use conditions be conducted to assure efficacy of the PowerFoam R-Control Geofoam.

When the exposure of PowerFoam R-Control Geofoam to any harmful chemicals is a possibility or in doubt, the protection of PowerFoam R-Control Geofoam by means of an appropriate barrier material is required.

Rating: Overall chemical exposure performance is noted by a rating symbol.
