Exterior Outside Corner	FC-507
Exterior Outside Corner	FC-507a
Exterior Inside Corner	FC-508
Exterior Inside Corner	FC-508a

Technical Bulletins

Substrate Preparation and Installation	Nailstrip No. 8001
Rainscreens	Nailstrip No. 8002

General Recommendations

R-Control Nailstrip Sizes

PowerFoam R-Control Nailstrip is made in a variety of sizes, most commonly 4' x 8'. Consult PowerFoam for sizes, thicknesses, and fabrication services available in your area.

Environmentally Safe

The core material for PowerFoam R-Control Nailstrip, PowerFoam R-Control insulation, contains no CFCs, HCFCs, HFCs or formaldehyde and is recyclable. PowerFoam R-Control insulation is inert, non-nutritive and highly stable. PowerFoam encourages you to support recycling and energy conservation.

Warranty

PowerFoam provides a 50-year warranty covering PowerI performance. Contact PowerFoam for details regarding the warranty program.

Handling - Storage - Protection

PowerFoam R-Control Nailstrip should be stored in a fully supported manner and protected from weather. Cover stored PowerFoam R-Control Nailstrip with tarps or similar protective wraps. Exposure 1 OSB facings are used in PowerFoam R-Control Nailstrip manufacture; however, exterior wall installations must be covered by a code recognized weather resistive barrier applied at the time of installation. Apply wall cladding when immediately practical.

Molded polystyrene contains a flame retardant additive. However, the molded polystyrene should be considered combustible and used with code approved thermal barriers and should not be stored near any open flame or source of ignition. Do not install or use molded polystyrene with coal-tar pitch or highly solvent extended mastics, adhesives or sealants. Consult PowerFoam for suggested adhesives, sealants, and assembly specifications not otherwise detailed in this manual.

General Recommendations - cont'd

Vapor Retarders

PowerFoam R-Control Nailstrip may require the use of a vapor retarder. Consult with a local design professional for a recommendation.

Special Treatments

PowerFoam R-Control Nailstrip can be produced with PowerFoam R-Control insulation with borate that protects the core insulation from potential termite damage. Please contact PowerFoam.

Disclaimer

Details, illustrations, pictures and guidelines provided herein give basic information and illustrate examples of PowerFoam R-Control Nailstrip installation. The basic information provide herein is not intended to cover every potential use and application of PowerFoam R-Control Nailstrip. It is the responsibility of the installer to become familiar with his specific application and determine if PowerFoam R-Control Nailstrip is suitable. By commencing work, the installer accepts full responsibility for the proper and safe installation of PowerFoam R-Control Nailstrip at his job site. Adding an insulation component may change the behavior of a wall assembly with regard to air movement, water vapor transmittance, bulk water management and heating, cooling and ventilation systems. It is the responsibility of the owner or the owner's representative to design the insulated wall assembly to perform in a manner ensuring function and durability. Furthermore, it is the sole responsibility of the installer to meet all federal and local regulatory requirements for job site safety for himself, his workers and any others on the job site while in the execution of all phases of PowerFoam R-Control Nailstrip installation.

General Notes

1. Provide adequate support for Nailstrip during storage.
2. Store Nailstrip flat and protected from weather.
3. Exterior applications:
Nailstrip must be covered with code recognized weather resistive barrier at time of installation. Apply wall covering to Nailstrip following wall covering manufacturer recommendations. Fasten trim to Nailstrip or wood blocking as required.
4. Interior applications:
Nailstrip must be covered with code approved thermal barrier. Fasten thermal barrier to Nailstrip or wood blocking as required.
5. Attachment of Nailstrip shall be with screws into structural members/substrate.
6. Each project shall be engineered as required.
7. Details provided are illustrative examples of Nailstrip installation and not intended to cover every potential use and application.
