

Molded Polystyrene Insulation.

PowerFoam R-Control molded polystyrene insulation is a cost effective, durable, and energy efficient solution for all types of insulation applications. PowerFoam R-Control Insulation is an insulation manufactured to provide architects, specifiers, distributors, and contractors all the features and benefits inherent in a quality insulation.

R-value – PowerFoam R-Control 100 has an R-value that never changes over time.

Strength – PowerFoam R-Control 100 has a compressive strength of 10 psi.

Moisture Resistance – PowerFoam R-Control 100 is a closed cell polystyrene insulation and is resistant to moisture gain.

Vapor Permeable – PowerFoam R-Control 100 allows moisture vapor to move through its structure.

Drying Potential – PowerFoam R-Control 100 rapidly releases absorbed moisture.

Applications.

- Cavity Wall
- Wall Sheathing
- Precast Concrete Core
- Flat/Tapered Roofing
- Plaza Deck/Vegetative Green Roof
- Drainage Board
- Waterproofing Protection

Proven to meet, or exceed, building codes.

PowerFoam R-Control insulation is manufactured under an industry leading quality control program monitored by UL and further recognized in UL Evaluation Report UL ER40338-01.

PowerFoam R-Control insulation meets Type I of ASTM C578, “Standard Specification for Rigid, Cellular Polystyrene Powerl Insulation”.

² Compressive strength is measured at 10 percent in accordance with ASTM C578. A safety factor is required to prevent long-term creep for sustained loads. For static loads, a safety factor of 3:1 is recommended.

³ ASTM C272 24 hour immersion followed by 24 hour storage in 75°F/50%RH air.
